

Fiber Optic Drop Application

Construction with private underground utilities / hazards

Before Reedsburg Utility / LightSpeed can begin underground construction, we require the property owner or authorized representative, to supply a map showing relative locations of all private facilities and equipment in potential construction paths. These private facilities may include sprinkler systems, sewer or water lines, existing telecom lines, underground electrical wiring, lawn lighting, propane lines, underground dog fencing, or any other electrical lines beyond your meter.

Property Owner Name:
Mailing Address:
City, State, Zip:
Email Address:
Property Service Address:

Date:
Daytime Phone Number:
Property Owner Signature:
Service Drop Fee:
Check #: (Send to LightSpeed, PO Box 230, Reedsburg)

Initial Here

I agree to supply a map to clearly identify all private facilities prior to start of construction activities. I understand that failure to supply this could result in damage to those facilities.

Initial Here

I understand that in the event of any damages to facilities that I did not indicate, Reedsburg Utility or its contractor(s) are not responsible and I agree to hold them harmless for any damage.

Initial Here

I understand that a 120V outlet is required for the electronics and for service to be supplied.

The above signed has requested and hereby authorizes the installation of a fiber service line and equipment by Reedsburg Utility (RUC) / LightSpeed on the property for future service connection at the above address.

Underground construction cannot begin until this form is signed and returned to Reedsburg Utility (RUC) along with payment and a map of private utilities. Please call 608-768-1000 with any questions you have regarding the application. Send application, map and payment to: 501 Utility Court, Reedsburg WI 53959

Please Note: A standard service drop includes vibratory plowing the service line from the road right-of-way to the customer premise. Fiber service drop does not include private service extensions. RUC / LightSpeed or its contractor will contact Digger’s Hotline prior to excavating on the premise. Through Digger’s Hotline, all public supply utilities will be marked from the right-of-way to the home or business. Any private utilities such as water, sewer, irrigation, utilities to out buildings, LP Gas, water wells, septic lines, and wood furnace lines will not be marked. RUC and its contractor(s) are not responsible for damage to private utilities that have not been shown on the owner provided map/sketch prior to the start of work. Turf restoration will only be completed on excavated turf areas in the right-of-way and not along the plow line or in the customers property. Turf restoration will only include a rough backfill of material. Standard installation fees may apply, additional fees may apply for non-standard installations.

Please Complete the Back Side of this Drop Application

Please sketch a map of your home and private utilities or attach a separate sheet to this application.

Draw a map of your property below or attach a printed aerial screen capture from google maps. Make sure to include the home, all unattached buildings and driveway. Map must include private underground utilities listed.	Septic / Drain Field:	<input type="checkbox"/> Yes, and is shown on my map	<input type="checkbox"/> None on this property
